The New York Times Book Review -

Dominique Browning

Seeing Seeds offers a cornucopia of photographs by Robert Llewellyn...The text, by Teri Dunn Chace, offers fascinating tidbits like the tale of the wild bleeding heart seed, which needs the help of ants that nibble away its outer layer before it can germinate.

Sunset

"Magical encapsulations of the future, seeds also are tiny worlds of their own. The new book, *Seeing Seeds*, explores them in near microscopic detail."

From the Publisher

"*Seeing Seeds* offers a cornucopia of photographs by Robert Llewellyn...The text, by Teri Dunn Chace, offers fascinating tidbits." —*The New York Times*

"Magical encapsulations of the future, seeds also are tiny worlds of their own. The new book, *Seeing Seeds*, explores them in near microscopic detail." —*Sunset*

"You'll never look at these important plant parts the same way again." —*Mother Nature Network*

"A marvelously artistic and detailed look at how plants perpetuate themselves...The energy and ingenuity of seeds practically jumps off the pages of the book." —*Pacific NW Magazine*

"What Llewellyn has done with his photographs is something akin to entering the temple of creation on a microscopic level." —*The Daily Progress*

"This is an odyssey full of wonder that's worthy of narration by Jacques Cousteau...So often we look, but we don't see. This book tries to change all that. Marvel at nature's symmetry, patterns and hidden textures." —*The English Garden*

"Revel in the splendor of the plant world with *Seeing Seeds*." —*Rodale's Organic Life*

"A breathtaking photographic journey into the world of seedheads, pods and fruit." —*Alpine Garden Society Journal*
