

First Detector

Charles Behnke and Dr. Nancy Taylor

Tuesday, July 28	5:30 pm – 8:30 pm
Education Credits: 3.0	Berea Library
Cost: Free	7 Berea Commons
Sorry, No Guests	Berea, Ohio 44017

First Detectors are part of the National Plant Diagnostic Network (NPDN) and the Ohio Plant Diagnostic Network (OPDN). First Detector training in Ohio promotes awareness and detection of new or emerging plant pest threats to Ohio's rural and urban agricultural or natural systems.

The National Plant Diagnostic Network (NPDN) First Detector program promotes the early detection of invasive, exotic plant pathogens, arthropods, nematodes, and weeds. Implementation of the NPDN program occurs primarily through partnering Land Grant University (LGU) members. The NPDN's lab network is prepared to assist in the rapid screening of plant pathogens and pests of concern in the event of an exotic plant pest detection. More information about NPDN, including links to our laboratories can be found on the NPDN website <http://www.npdn.org>.

Registrations must be received by Tuesday, July 21st.

Register by email to Pat Koch, Volunteer Coordinator: Koch.399@osu.edu. Please put "First Detector" in the subject line. To register by mail return the registration blank below.
