

OHIO STATE UNIVERSITY EXTENSION

A Cuyahoga County Master Gardener Continuing Education Program

Spring Rhododendron Program

Dr. Stephen Krebs, Holden Arboretum

The Holden Arboretum's David G. Leach Research Station is a satellite facility maintained for horticultural research on a 30-acre property, 40 minutes east of Holden's Kirtland campus. The land was a gift to Holden from David Leach, PhD, who developed it as a rhododendron breeding and evaluation garden. Normally closed to the general public, Dr. Stephen Krebs will host our tour this spring when the gardens are in bloom.

We plan to facilitate carpooling for those who are interested.

**Wednesday, May 18
10:00 AM—12:00 PM**

**David G. Leach Station
1890 Hubbard Rd,
Madison, OH 44057**
