Instructor: Denise Ellsworth

Program Director, Honey Bee & Native Pollinator Education

Department of Entomology/Extension, The Ohio State University

Gardeners play a vital role in the development and conservation of habitat that benefits pollinators, including bees, birds and butterflies. This program will focus on pollinator biology and ID, as well as the practical steps gardeners can take to create or enhance habitat, including plant selection and simple design elements. By creating a patchwork of garden spaces that provide food and shelter for pollinators, gardeners can positively impact the health and survival of these important creatures.

**Gardening for Pollinators**  
**Deadline for Registration is November 15, 2017**
