

## Interested in learning more about photography?

Join OSU Extension Ed Tech Specialist & macro photographer, Danae Wolfe, at Secret Arboretum to learn the basics of shooting close-up and macro photos of insects and flowers.

## Saturday & Sunday, July 7-8, 2018

Both sessions will be held at Miller Pavilion at Secret Arboretum from 10am-3pm.

### Day one: Intro to Macro Photography

This introductory course will include the basics of photography. We'll cover the exposure triangle, creative (and inexpensive) macro techniques, and using your camera to capture great images.

### Day two: Field Session & Critiques

For this session, we'll head outside for a hands-on photography field session. We'll focus on mastering your equipment, learning to see like a photographer, & composing beautiful shots. After the field session, we'll head inside for a constructive critique of the photos you took!
